

Stable Doors

Classic in design and modern in safety and construction, a stable door is a handsome feature for almost any home.

Our uPVC Stable Doors offer great versatility, allowing you to ventilate a room effectively without having to open the door fully, and to keep children and pets safely indoors.

Traditional shiplap panels are available to the base, whilst the top half of the door can be fully glazed, partially glazed or solid. The glazed units can either be clear glass or one of the designs from our extensive selection of Pilkington obscure patterns.

Whatever your chosen combination, rest assured that a stable door will charge your home with natural light and invigorating fresh air.
