

# Charisma Vertical Slider

Charisma is a modern vertical sliding sash window that combines classic, elegant detailing from the Georgian era with the very latest production techniques and technologies.

This cutting edge design incorporates modern low line beads, enhanced weather protection and inward opening sashes that allow easy cleaning.

Charisma is a stylish window that offers strong, secure build with incredibly low maintenance and, thanks to the innovative aluminium security bar, it is one of the most secure vertical sliders available.

The Charisma vertical sliding sash window complies with the building regulations concerning thermal efficiency when used with thermally efficient glass.
